

FROST *Fighter* PORTABLE HEATERS

MODELS IDF350 & IDF350-II OIL

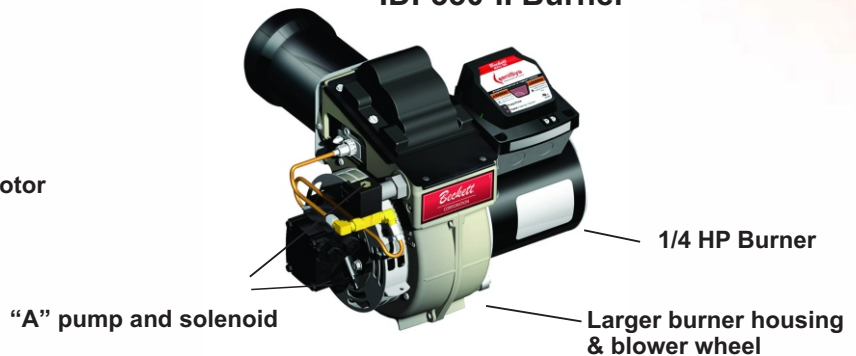

The IDF350 is an economical heating solution that is comparable to competitors in the same BTU class. With a smaller clean cut pump with an integrated solenoid & a 1/7 HP motor, it provides less amp draw than the IDF350-II. The IDF350-II is above standard in the industry and provides a larger A pump and separate solenoid with the larger 1/4 HP motor. That combination provides more capacity in the harshest environments where fuel is more dense & less quality grade. The A pump provides longer run & rise ratios for external hoses.
